

## Environmental Policy

Port Aventura Entertainment, S.A.U., managing company and owner of PortAventura World Parks & Resort, family leisure destination that encompasses PortAventura Park, PortAventura Caribe Aquatic Park, Ferrari Land, Hotel PortAventura, Hotel El Paso, Hotel Caribe, Hotel Gold River, Hotel Mansión de Lucy, Hotel Colorado Creek, PortAventura Convention Centre, Parking Caravaning and PortAventura Dreams Village carries out its activities with maximum respect for the environment and its surroundings.

In order to comply with its commitment to the protection of the environment, the company continuously carries out the necessary actions, takes the relevant measurements and strives to improve its environmental results. To this end, PortAventura World's actions are governed by the following principles:

1. To ensure compliance with applicable environmental laws, and other voluntary requirements to which it subscribes, making them a part of its Environmental Policy.
2. To assign all means and responsibilities necessary to guarantee the attainment of objectives that lead to continual improvements in environmentally-friendly behaviours, designing processes that aim to minimise and prevent activities impacting upon the environment.
3. To ensure compliance with environmental objectives through Equip Verd, an environmental consultancy and executive committee, to consolidate the basis for the promotion of respect for the environment.
4. To educate, train and raise awareness, at all levels, amongst company personnel to create an atmosphere conducive to the progression of all environmental measures.
5. To communicate the Environmental Policy to everybody working within or on behalf of the organisation, including contractors and suppliers, as well as other stakeholders.
6. To identify the environmental aspects and associated impacts from a life cycle perspective.
7. To promote, to the maximum possible extent, projects that encourage our visitors to respect the environment.
8. To preserve our region's biodiversity and ecosystems, protecting the species and habitats within it.
9. To work on improvements focused on the prevention and reduction of food losses and waste, through objectives that seek to involve workers and visitors.
10. To encourage and commit to mitigation and adaptation of practices to climate change: sustainable use of natural resources (water and electricity), promoting sustainable mobility and renewable electricity initiatives, as well as offsetting and neutralising our carbon footprint; encouraging reduction, reuse, and recycling of wastes, prioritising waste treatment.
11. To guarantee that our suppliers share and commit to our Policy and the same environmental standards. As well as to promote environmental criteria in product purchasing, contracting of services and events management, acting as a driving force in circular economy initiatives.
